

Capacitors - Type 'O'

NOTES

Standard air gap: 0.21mm
 Breakdown voltage: 750V DC
 Temperature coefficient: <100 ppm, per °C
 Classis steel: zinc plated
 Rotor spindle: brass - clean
 Vanes: aluminium - clean

A single or dual gang capacitor in 365pF or 410pF as standard with a 1/4" shaft. Unmeshed 10pF.

All ferrous parts are plated.

Options can include motor drive, plastic shafts, external trimmers, 6mm spindles etc.

The possibility exists to produce this unit as an FM gang minimum capacity 4pF swing 12, 16, 20pF or 9pF swing 48pF.

Order No.	Gang	pF	Dim. 'X'
5250/1/365	1	365	23.8
5250/2/365	2	365	42.9
5250/1/410	1	410	23.8
5250/2/410	2	410	42.9

5250/1/365	£ 9.56
5250/2/365	£ 13.97
5250/1/410	£ 9.56
5250/2/410	£ 13.97
